Associate in Technical Studies, Information Technology,
Eastern Gateway Community College
05/2021

Certified Scrum Master
12/2021

AWS Certified Cloud Practitioner
10/2020

PROFESSIONAL EXPERIENCE

Software Engineer, JPMorgan Chase
06/2022 – present
• Designed and enhanced user interfaces for internal applications, focusing on improving user experience and accessibility.
• Partnered with designers and cross-functional teams to deliver innovative UI features aligned with business goals.
• Implemented and showcased UI improvements, leading to a 17% reduction in user support tickets within the first year.
• Developed and standardized front-end frameworks across digital project teams to ensure consistency and scalability.
• Utilized technologies such as React, JavaScript, HTML/CSS, Redux, and GraphQL to build dynamic, high-performance user interfaces.

Web Content Developer, Abercrombie & Fitch
01/2021 – 06/2022
- Managed and maintained content for domestic and regional kids' sites, ensuring timely updates for promotions and sales.
- Collaborated with marketing teams to publish content utilizing HTML5, JavaScript, and CSS.
- Streamlined workflows by creating, updating, and maintaining JIRA tickets, resulting in improved operational efficiency.
- Developed custom web content through AEM and CMC tools, enhancing user engagement and website functionality.

Data Center Intern, Amazon Web Services (AWS)
06/2020 – 09/2020
- Build Webhooks using python/AWS to notify staff of ticket changes
- Create technical documentation on AWS internal platform for assigned projects and repairs
- Troubleshoot, repair, and maintain data center server hosts

Operations Intern, State of Ohio (DAS)
01/2018 – 06/2020
- Create and maintain Tableau Dashboards and visuals

PROJECTS

Tesla Homepage Clone - with Roadster and Cybertruck section ⎘
https://devynqualls.github.io/teslahome/
- Built a Tesla homepage clone featuring custom sections for upcoming Roadster and Cybertruck models.
- Developed using React, JavaScript, HTML, and CSS; deployed on GitHub Pages.

Devflix- Netflix Clone
https://main--graceful-narwhal-9dc749.netlify.app/
- Created a Netflix-inspired UI clone using React, JavaScript, HTML/CSS, and TMDB.com API for movie data.
- Deployed on Netlify for seamless performance.
